JASMIN KASET

FULL STACK SOFTWARE DEVELOPER

EXECUTIVE PROFILE

Writer, programmer, and morning-person ready to join the tech workforce in my hometown of Nashville. My previous careers, both entrepreneurial partnerships, were crash courses in creative solutions on-the-go, teamwork, system-implementation, and building a vision from the ground up. I'm a firm believer in hustle over luck and bringing a great attitude into every day. I love people, the big picture, and utilizing new technologies.

CAREER SUMMARY

• 5+ years experience working as liaison between designer and client, talent and buyer, customer and corporate
• Extremely proficient writer and communicator
• 1 year with HTML and CSS
• 6 months with JavaScript and React.js
• Introduction phase of Python and Django

PROFESSIONAL EXPERIENCE

Apprentice

Nashville Software School | October 2020 - Present

NSS is an intensive six-month, full-time boot camp that focuses on learning the skills and technologies to become a full-stack developer. Largely conducted in a simulated company environment with Scrum methodology, the NSS curriculum focuses on professional training, group and individual project based learning, and problem solving with growth mindset.

Project: Runner's-Hi
Runner's-Hi is a web application that tracks the one thing your current running app doesn't: the effect of exercise on your emotional well-being. Within an interactive and streamlined interface, users track their before and after running statistics in a two part questionnaire and are given statistical feedback on the effects of exercise on their well-being over time. Responsibilities included:

• Creating a single page web application using React
• Adhering to wireframed data structures in ERD & modular file structure in VS Code
• Properly utilizing state to update the DOM
• CRUD with respect to external and user-generated APIs
• Styling to facilitate a natural user interface experience

Technologies used: React.js, JavaScript, HTML and CSS, JSON server, React Bootstrap, GitHub

Group Project: Holiday Road
In a 6 day agile-scrum sprint, my team created "Nutshell", a social media style dashboard for a user to organize daily tasks, events, news articles, friends, and chat messages. Responsibilities included:
• Creating and resolving issue tickets on a Github project board
• Group planning, collaboration, and delegation
• Committing to ERD, wireframing, dependency graphs, relational data
• Interacting with external APIs, storing data in local json server APIs

Technologies used: Vanilla JavaScript, HTML and CSS, JSON server, GitHub

Director of Operations / Partner

Sideshow Sign Co. | 2012 – 2017

Sideshow Sign Co. is an award-winning Nashville-based design company focused on signage and dimensional branding. I started Sideshow in a friend's garage with my business partner in 2012. Five years later our client list included Nike, ESPN, Warby Parker, Panera, and Whole Foods corporate. Responsibilities include:

• Setting up the business admin from the ground up, pulling permits, creating LLC, registering for state and local taxes, business insurance, etc.
• Project management, budgeting, sourcing rare/used materials for custom signage, concept development for product lines, overseeing all scheduling and operations related to custom sign fabrication for businesses.
• Employee management, scheduling, hiring, submitting payroll
• Working closely with clients from small businesses to large corporations on commissions
